Anthropic Response: claude-opus

Hello John! Based on the information you provided, I can help you determine the year you were born.

Given:

- Your name is John.
- You are 30 years old.
- You were born in the month of January.
- Today's date is May 9, 2024.

To calculate your birth year, we need to subtract your age from the current year.

Current year: 2024 Your age: 30

Birth year = Current year - Your age Birth year = 2024 - 30 Birth year = 1994

Since you were born in January, and today's date is May 9, 2024, you have already celebrated your 30th birthday this year.

Therefore, you were born in January 1994.

Price : \$0.013590

Anthropic Response: claude-sonnet

To figure out the year you were born, I need to work backward from the current date.

Given information:

- Today's date is May 9, 2024.
- Your age is 30.
- You were born in the month of January.

Since your age is 30, that means you turned 30 sometime between May 9, 2023, and May 8, 2024.

To find the year you were born, I'll subtract 30 years from 2024: $2024 - 30 = 1994$

Therefore, based on the information provided, you were born in January 1994.

Price : \$0.002298

Anthropic Response: claude-haiku

To determine the year you were born, we can use the information provided:

- Your age is 30
- You were born in the month of January

We know that today is May 9, 2024. Since you are 30 years old, we can subtract your age from the current year to find the year you were born.

- Current year: 2024
- Your age: 30
- Year of birth: $2024 - 30 = 1994$

Therefore, based on the information provided, you were born in the year 1994.
